***Published: 15 December, 2015***

#### ***Abstract***

Positive education focuses on helping students not only achieve academically, but also to thrive. This workshop will consider what well-being and flourishing is and how well-being science applies to education. Core constructs and positive interventions that can be used with individuals, groups, and organizations to build well-being and resilience will be explored. Specific activities that can be used with students and staff will be provided.
